Ein Stein Brew House

IS PLEASED TO INTRODUCE BREAKTHROUGH TECHNOLOGY FOR:

Water filtration that allows you to be in control of the quality of water you drink!

ZERO WATER®
For water that's only water

ZeroWater pour-through filters (ZF-201) are the first NSF/ANSI Standard 53 filters certified for the reduction of *lead* in your drinking water

• Better than bottled water at a fraction of the cost • NSA/ANSI Standard 42 & 53 certified; to reduce lead, chlorine, mercury, chromium and hydrogen sulfide • Provides more complete filtration than ordinary carbon filters • Leaves behind nothing but crisp tasting, clean water • Converts tap water into clean H_2O!

Come in and let us show you how it works works!

Eliminate the guesswork... each kit has a TDS meter that allows you to measure the quality of your water, making it easy to know when to change your filter.

Eliminate all your water bottle troubles...
- no storage
- no lugging
- no delivery

just a simple change of a filter, not a heavy water bottle.
Sits on top of your existing cooler or stand.

ZeroWater also offers a pitcher style filtration system that fits conveniently into your refrigerator and has an exclusive in-fridge push button dispenser in addition to the pour spout!

You be the judge. Don't rely upon guesswork to replace your filters. Let the TDS meter definitively inform you when filters need replacing and be confident of drinking clean, crisp tasting water.
